

Make your own statue

Iron Age queen

My name is Boudicca and I am Queen of the Iceni tribe! In AD 60, I fought against the Romans and burnt the city of Verulamium to the ground!

Colour in, cut out and make up your statue. Stand her on display at home.

Boudicca and her Iceni tribe fought against the Roman invasion. However the Romans were victorious and the local Catuvellauni tribe soon adapted to a new way of life in Verulamium. It grew to become the third largest city in Roman Britain.

Printing your colouring papercraft activity sheet

Please feel free to print as many copies of this St Albans Museums colouring papercraft sheet as you wish. It is intended for your personal use only. You will need Adobe Acrobat Reader to open and print the PDF digital file. You can download this free software at www.adobe.com.

Our tips for the best printing results:

- Print onto white paper or thin A4 card, we suggest a weight of 160-220 gsm.
- Find card with a **matte finish** - shiny card is not so good when using colouring pencils.
- Make sure you print **actual size** with scaling set to **100%**.
- If possible, select **A4 borderless printing** in your printer settings.

Please take care using scissors and ask an adult to help if you need to.

We would love to see your creations
